

Configuración en el Entourage de Mac

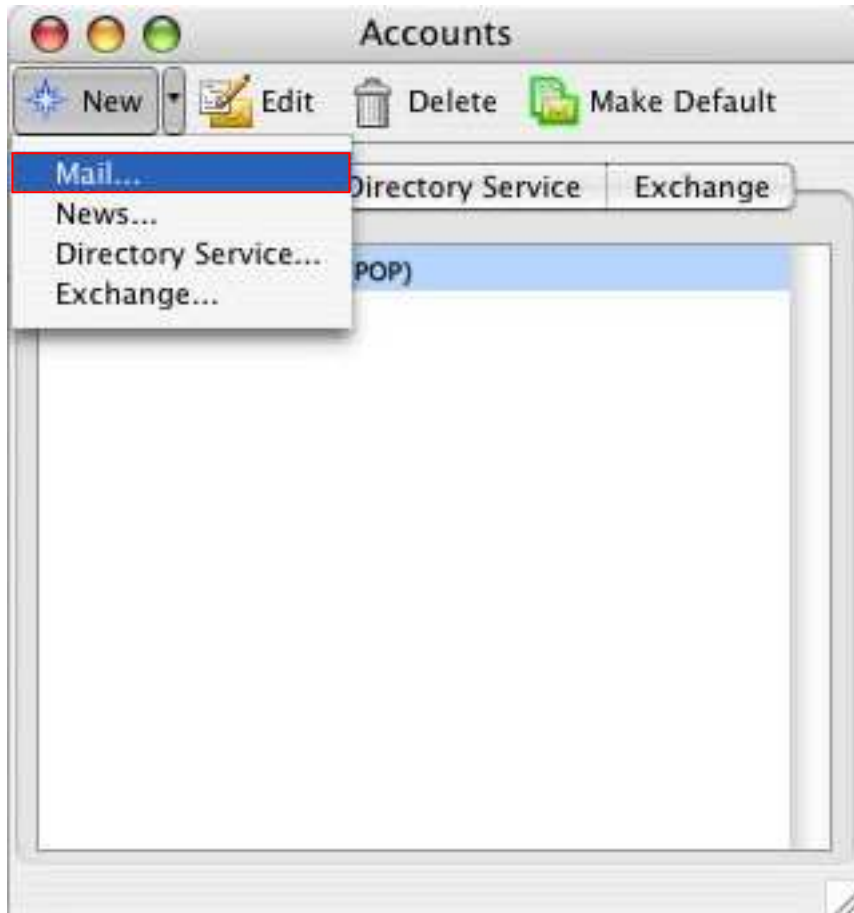

A continuación se detallarán los pasos para configurar una cuenta de correo en el Entourage, de un dominio alojado en nuestros servidores.

Estos pasos hacen referencia a la cuenta inexistente ‘usuario@uname.com.ar’ del dominio imaginario ‘uname.com.ar’. Usted deberá completar los campos de acuerdo a la cuenta de desee configurar y al dominio que tenga registrado.

Para crear una cuenta ingrese en “Tools (Herramientas)” -> “Accounts (cuentas)”.

Presione “New (Nuevo)” -> “Mail”.

Ingrese su nombre y presione la flecha de la derecha.

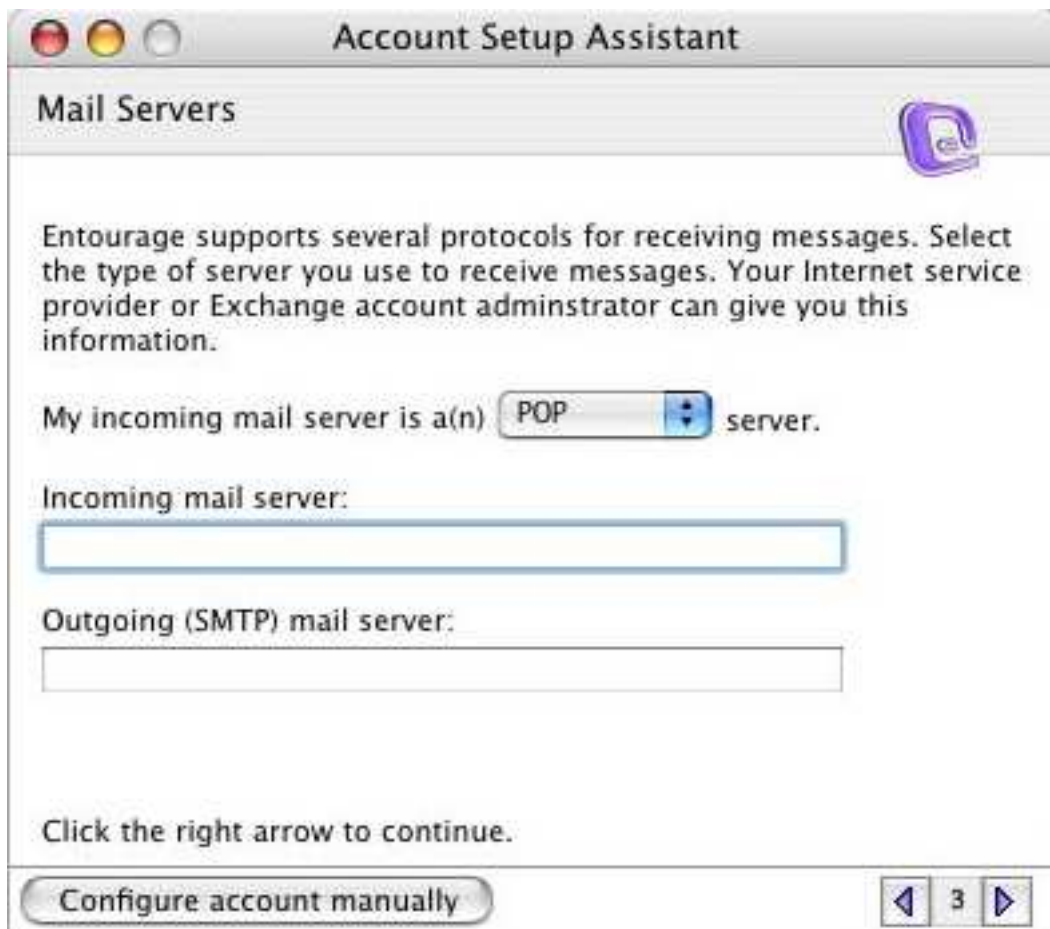

The screenshot shows a window titled "Account Setup Assistant" with a standard macOS-style title bar (red, yellow, and grey buttons). The main content area has a header "Your Name" on the left and a purple icon of a computer monitor on the right. Below the header, there is a paragraph of text: "When you send a message, your name appears in the From box of the message. Type your name as you would like it to appear." Underneath this text is a label "Your name:" followed by a rectangular text input field. Below the input field is the text "For example: John Smith". At the bottom of the window, there is a footer area with the text "Click the right arrow to continue." on the left, a button labeled "Configure account manually" in the center, and a navigation control on the right consisting of a left arrow, the number "1", and a right arrow.

Ingrese la dirección de correo de la forma usuario@uname.com.ar (donde usuario es el nombre de la casilla y, uname.com.ar es el dominio que tiene alojado con nosotros).

The screenshot shows a window titled "Account Setup Assistant" with a standard macOS-style title bar (red, yellow, and grey buttons). The main content area is titled "Your E-mail Address" and includes a purple envelope icon. Below the title, there is a descriptive sentence: "Your e-mail address is the address other people will use to send messages to you." Two radio button options are presented: the first is selected and reads "I already have an e-mail address that I'd like to use.", followed by a text input field labeled "E-mail address:" and the example "For example: someone@microsoft.com". The second option is "I will set up my e-mail account later." At the bottom of the window, there is a button labeled "Configure account manually" and a navigation control consisting of a left arrow, the number "2", and a right arrow.

Tanto en “Incoming mail server (servidor de correo entrante)” y “Outgoing (SMTP) mail server (servidor de correo saliente)” ingrese mail.uname.com.ar (donde unname.com.ar es el dominio que tiene alojado con nosotros).

En “Account ID” ingrese usuario@uname.com.ar (donde usuario es el nombre de la casilla y, uname.com.ar es el dominio que tiene alojado con nosotros).

Account Setup Assistant

Account ID and Password

Please type the account ID and password your Internet service provider has given you.

Account ID:

Note: The account ID is not your e-mail address. Typically, it is the text in your e-mail address before the at sign (@).

Password:

Save password in my Mac OS keychain

Note: To receive messages without entering your password each time, select the Save password check box.

Click the right arrow to continue.

Configure account manually

◀ 4 ▶

Ingrese un nombre para la cuenta en “Account name (nombre de cuenta)” y presione el botón “Finish (finalizar)”.

Account Setup Assistant

Congratulations

You have entered all of the information required to set up your account.

Please type a name for this account. This name is used only for display purposes.

Account name:

To include this account in your Send & Receive All schedule for sending and receiving messages, select the check box below.

Include this account in my Send & Receive All schedule

To save these settings, click Finish.

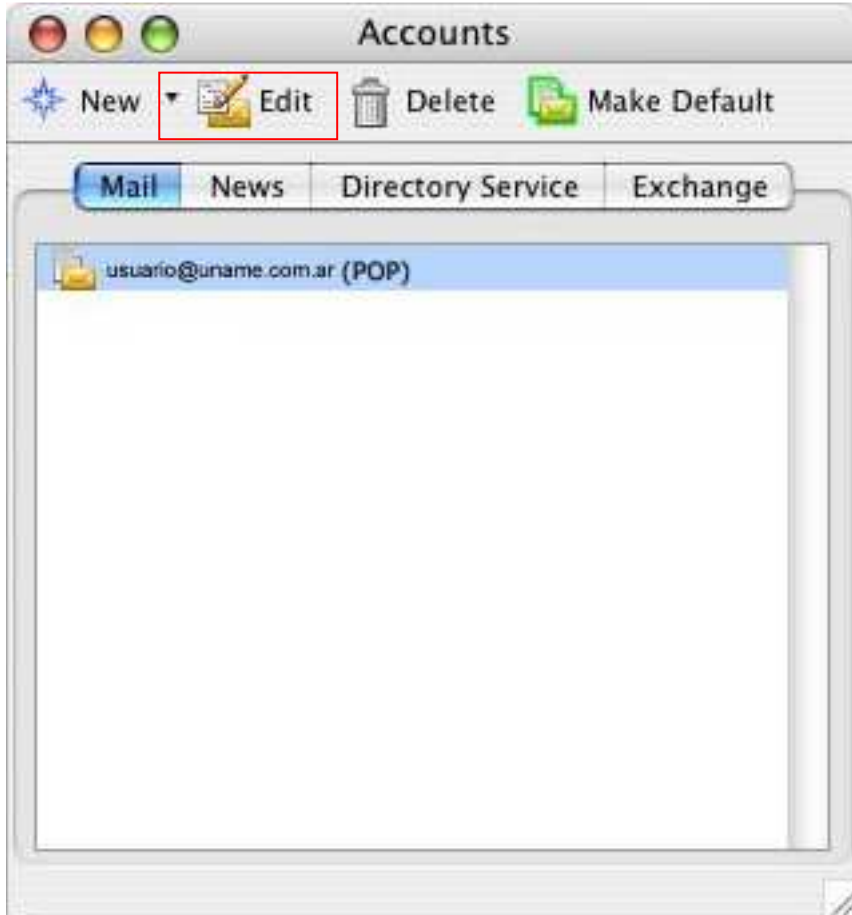

Finish

Tip: You can run schedules from the Tools menu.

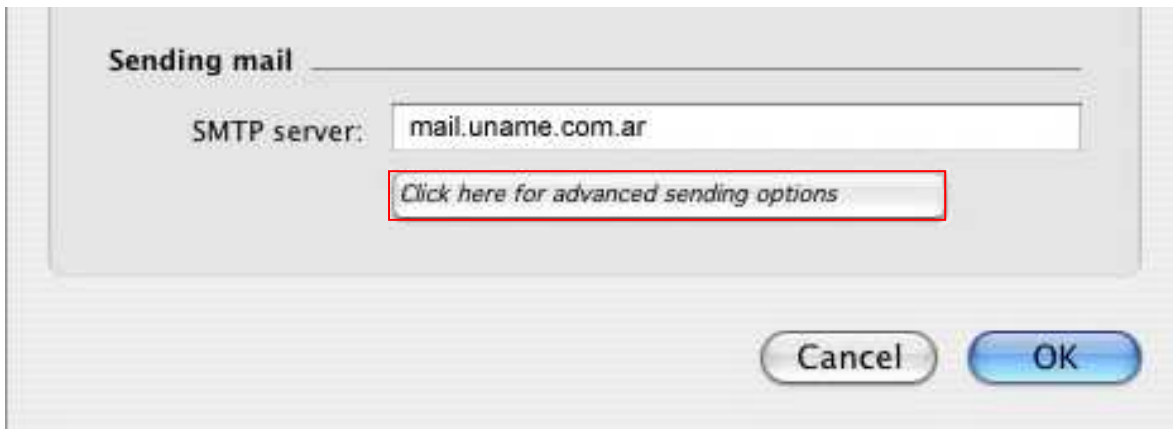

Configure account manually

◀ 5 ▶

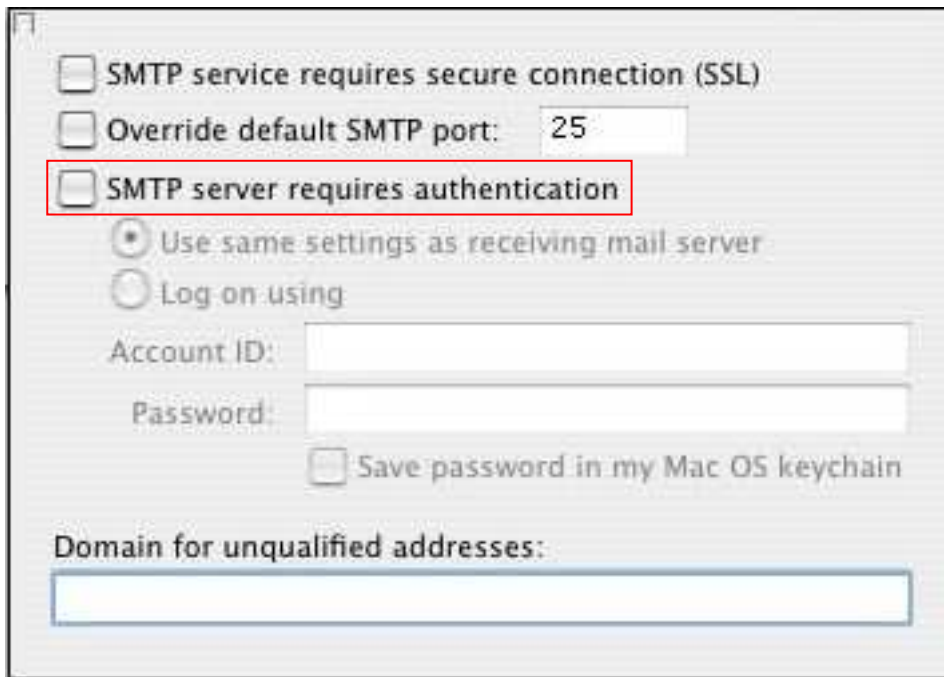

Seleccione la cuenta y presione el botón “Edit (Editar)”.

Presione el botón “Click here for advanced sending options”

Tilde la opción “SMTP server requires authentication” y, la cuenta ya estará configurada.

The image shows a configuration window for an email account. The following options are visible:

- SMTP service requires secure connection (SSL)
- Override default SMTP port: 25
- SMTP server requires authentication (highlighted with a red box)
- Use same settings as receiving mail server
- Log on using
- Account ID:
- Password:
- Save password in my Mac OS keychain
- Domain for unqualified addresses:

Esperamos que este pequeño tutorial le resulte útil.
